

AMENDMENTS TO THE SPECIFICATION (37 CFR §1.121(b))

Please insert the following paragraph prior to line 1 of page 1 of the specification.

FIELD OF THE INVENTION

Please insert the following paragraph between lines 2-3 at page 1 of the specification.

BACKGROUND OF THE INVENTION

Please insert the following paragraph between lines 11-12 at page 2 of the specification.

SUMMARY OF THE INVENTION

Please insert the following paragraph between prior to line 1 of page 5 of the specification.

BRIEF DESCRIPTION OF THE DRAWINGS

Please insert the following paragraph prior to line 1 of page 6 of the specification.

DETAILED DESCRIPTION OF PREFERRED VERSIONS OF THE INVENTION

Please insert the following Abstract following the claims (such Abstract, as taken from corresponding PCT publication WO2005083164, also being provided on a separate sheet accompanying this Preliminary Amendment, as per 37 CFR §1.72(b)):

Electrical components are formed in a fabric during the weaving process by a series of crossing conductors in the warp and weft fibres of the fabric. Some of the crossing points provide permanent Separation of the crossing conductors, others permanent connection of the crossing conductors and others connection upon the application of pressure to the fabric. The structure provides the possibility of forming a greater range of components and more reliable component characteristics than heretofore possible.
